**(i) Klasifikasi (lanjutan)**

Model bisnis Bank untuk mengelola aset keuangan mengacu pada bagaimana mereka mengelola aset keuangannya untuk menghasilkan arus kas. Model bisnis menentukan apakah arus kas akan dihasilkan dari penerimaan arus kas kontraktual, penjualan aset keuangan, atau keduanya.

Bank mengukur aset keuangan pada biaya perolehan diamortisasi jika kedua kondisi berikut terpenuhi:

- Aset keuangan dimiliki dalam model bisnis dengan tujuan untuk memiliki aset keuangan dalam rangka mendapatkan arus kas kontraktual; dan
- Persyaratan kontraktual dari aset keuangan menghasilkan arus kas pada tanggal tertentu yang merupakan SPPB dari jumlah pokok terutang.

Aset keuangan diukur pada nilai wajar melalui penghasilan komprehensif lain jika dua kondisi berikut terpenuhi:

- Aset keuangan dikelola dalam model bisnis yang bertujuan untuk mendapatkan arus kas kontraktual dan menjual aset keuangan; dan
- Persyaratan kontraktual dari aset keuangan tersebut memenuhi kriteria SPPB.

Aset keuangan lainnya yang tidak memenuhi persyaratan untuk diklasifikasikan sebagai aset keuangan diukur pada biaya perolehan diamortisasi atau nilai wajar melalui penghasilan komprehensif lain, diklasifikasikan sebagai diukur pada nilai wajar melalui laba rugi.

Saat pengakuan awal, Bank dapat membuat penetapan yang tidak dapat dibatalkan untuk mengukur aset yang memenuhi persyaratan untuk diukur pada biaya perolehan diamortisasi atau nilai wajar melalui penghasilan komprehensif lain pada nilai wajar melalui laba rugi, apabila penetapan tersebut mengeliminasi atau secara signifikan mengurangi inkonsistensi pengukuran atau pengakuan (kadang disebut sebagai "accounting mismatch").

**2. SUMMARY OF MATERIAL ACCOUNTING POLICIES INFORMATION (continued)**

**b. Financial assets and financial liabilities (continued)**

**(i) Classification (continued)**

The Bank's business model for managing financial assets refers to how it manages its financial assets in order to generate cash flows. The business model determines whether cash flows will result from collecting contractual cash flows, selling the financial assets, or both.

The Bank measures financial assets at amortized cost if both of the following conditions are met:

- Financial assets are managed in a business model that aims to hold financial assets in order to obtain contractual cash flows; and
- The contractual terms of the financial asset give rise on specified dates to cash flows that are SPPI on the outstanding principal amount.

Financial assets are measured at fair value through other comprehensive income if both of the following conditions are met:

- Financial assets are managed in a business model that aims to collect contractual cash flows and sell financial assets; and
- The contractual terms of the financial asset meet the SPPI criteria.

Other financial assets that do not meet the requirements for classification as financial assets measured at amortized cost or fair value through other comprehensive income, are classified as measured at fair value through profit or loss.

At initial recognition, the Bank may make an irrevocable determination to measure assets that meet the requirements to be measured at amortized cost or fair value through other comprehensive income at fair value through profit or loss, if that designation eliminates or significantly reduces measurement or recognition inconsistencies (sometimes referred to as "accounting mismatch").

**(i) Klasifikasi (lanjutan)**

Pada saat pengakuan awal, Bank dapat membuat pilihan yang tidak dapat dibatalkan untuk menyajikan instrumen ekuitas yang bukan dimiliki untuk di perdagangan pada nilai wajar melalui penghasilan komprehensif lain.

Penilaian model bisnis

Model bisnis ditentukan pada level yang mencerminkan bagaimana kelompok aset keuangan dikelola bersama-sama untuk mencapai tujuan bisnis tertentu.

Penilaian model bisnis dilakukan dengan mempertimbangkan, tetapi tidak terbatas pada hal-hal berikut:

- Bagaimana kinerja dari model bisnis dan aset keuangan yang dimiliki dalam model bisnis dievaluasi dan dilaporkan kepada personil manajemen kunci Bank;
- Apakah risiko yang memengaruhi kinerja dari model bisnis (termasuk aset keuangan yang dimiliki dalam model bisnis) dan khususnya bagaimana cara aset keuangan tersebut dikelola; dan
- Bagaimana penilaian kinerja pengelola aset keuangan (sebagai contoh, apakah penilaian kinerja berdasarkan nilai wajar dari aset yang dikelola atau arus kas kontraktual yang diperoleh).

Aset keuangan yang dimiliki untuk diperdagangkan dan penilaian kinerja berdasarkan nilai wajar diukur pada nilai wajar melalui laba rugi.

Penilaian mengenai arus kas kontraktual yang diperoleh semata dari pembayaran pokok dan bunga

Untuk tujuan penilaian ini, pokok didefinisikan sebagai nilai wajar dari aset keuangan pada saat pengakuan awal. Bunga didefinisikan sebagai imbalan untuk nilai waktu atas uang dan risiko kredit terkait jumlah pokok terutang pada periode waktu tertentu dan juga risiko dan biaya peminjaman standar, dan juga margin laba.

**2. SUMMARY OF MATERIAL ACCOUNTING POLICIES INFORMATION (continued)**

**b. Financial assets and financial liabilities (continued)**

**(i) Classification (continued)**

At initial recognition, the Bank may make an irrevocable choice to present equity instruments that are not held for trading at fair value through other comprehensive income.

Business model assessment

The business model is defined at a level that reflects how groups of financial assets are managed together to achieve specific business objectives.

The business model assessment is carried out by considering, but not limited to, the following:

- How is the performance of the business model and financial assets held in the business model evaluated and reported to key management personnel of the Bank;
- What are the risks that affect the performance of the business model (including financial assets held in the business model) and specifically how those financial assets are managed; and
- How is the performance of the financial asset manager assessed (for example, is the performance assessment based on the fair value of the managed assets or the contractual cash flows obtained).

Financial assets held for trading and performance assessment based on fair value are measured at fair value through profit or loss.

Assessment of the contractual cash flows derived solely from payments of principal and interest

For the purposes of this valuation, principal is defined as the fair value of the financial asset at initial recognition. Interest is defined as the consideration for the time value of money and credit risk related to the principal amount owed in a specific period of time as well as standard borrowing risks and costs, as well as profit margin.

**(i) Klasifikasi (lanjutan)**

Penilaian mengenai arus kas kontraktual yang diperoleh semata dari pembayaran pokok dan bunga (lanjutan)

Penilaian mengenai arus kas kontraktual yang diperoleh semata dari pembayaran pokok dan bunga dilakukan dengan mempertimbangkan persyaratan kontraktual, termasuk apakah aset keuangan mengandung persyaratan kontraktual yang dapat merubah waktu atau jumlah arus kas kontraktual.

Dalam melakukan penilaian, Bank mempertimbangkan:

- Peristiwa kontinjensi yang akan mengubah waktu atau jumlah arus kas kontraktual;
- Fitur *leverage*;
- Persyaratan pembayaran di muka dan perpanjangan kontraktual;
- Persyaratan mengenai klaim yang terbatas atas arus kas yang berasal dari aset spesifik; dan
- Fitur yang dapat merubah nilai waktu dari elemen uang.

Bank mengklasifikasikan liabilitas keuangan dalam kategori:

- Liabilitas keuangan yang diukur pada nilai wajar melalui laba rugi; dan
- Liabilitas keuangan yang diukur dengan biaya perolehan diamortisasi.

Liabilitas keuangan yang diukur pada nilai wajar melalui laba rugi terdiri dari dua sub-kategori, yaitu liabilitas keuangan diklasifikasikan sebagai diperdagangkan dan liabilitas keuangan yang pada saat pengakuan awal telah ditetapkan oleh Bank untuk diukur pada nilai wajar melalui laba rugi.

Liabilitas keuangan diklasifikasikan sebagai dimiliki untuk diperdagangkan jika liabilitas keuangan tersebut diperoleh untuk tujuan dibeli kembali dalam waktu dekat atau jika merupakan bagian dari portofolio instrumen keuangan tertentu yang dikelola bersama dan terdapat bukti mengenai pola ambil untung dalam jangka pendek yang terkini.

**(i) Classification (continued)**

Assessment of the contractual cash flows derived solely from payments of principal and interest (continued)

The assessment of contractual cash flows derived solely from payments of principal and interest is made by considering the contractual terms, including whether the financial asset contains contractual terms that can change the timing or amount of the contractual cash flows.

In conducting the assessment, the Bank considers:

- Contingent events that will change the timing or amount of contractual cash flows;
- Leverage feature;
- Requirements for prepayments and contractual extensions;
- Requirements regarding claims that are limited to cash flows arising from specific assets; and
- Features that can change the time value of the money element.

The Bank classifies financial liabilities into the following categories:

- Financial liabilities measured at fair value through profit or loss; and
- Financial liabilities measured at amortized cost.

Financial liabilities measured at fair value through profit or loss consist of two sub-categories, namely financial liabilities classified as trading and financial liabilities which upon initial recognition have been determined by the Bank to be measured at fair value through profit or loss.

A financial liability is classified as held for trading if it is acquired primarily for the purpose of repurchasing in the near term or if it is part of a jointly managed portfolio of certain financial instruments and there is evidence of a recent short-term profit taking pattern.

(i) Klasifikasi (lanjutan)

Penilaian mengenai arus kas kontraktual yang diperoleh semata dari pembayaran pokok dan bunga (lanjutan)

Keuntungan atau kerugian atas liabilitas yang dimiliki untuk diperdagangkan diakui dalam laporan laba rugi.

Bank mengklasifikasikan seluruh liabilitas keuangan setelah pengakuan awal diukur pada biaya perolehan diamortisasi, kecuali:

- Liabilitas keuangan yang diukur pada nilai wajar melalui laba rugi;
- Liabilitas keuangan yang timbul ketika pengalihan aset keuangan tidak memenuhi syarat penghentian pengakuan atau ketika pendekatan keterlibatan berkelanjutan diterapkan;
- Kontrak jaminan keuangan;
- Komitmen untuk menyediakan pinjaman dengan suku bunga di bawah pasar; atau
- Imbalan kontinjensi yang diakui oleh pihak pengakuisisi dalam kombinasi bisnis.

(ii) Pengakuan awal

- Pembelian atau penjualan aset keuangan yang memerlukan penyerahan aset dalam kurun waktu yang telah ditetapkan oleh peraturan dan kebiasaan yang berlaku di pasar (pembelian secara reguler) diakui pada tanggal penyelesaian.
- Aset keuangan dan liabilitas keuangan pada awalnya diukur pada nilai wajarnya. Dalam hal aset keuangan atau liabilitas keuangan tidak diukur pada nilai wajar melalui laba rugi, nilai wajar tersebut ditambah/dikurangkan biaya transaksi yang dapat diatribusikan secara langsung. Pengukuran aset keuangan dan liabilitas keuangan setelah pengakuan awal tergantung pada klasifikasinya.

(i) Classification (continued)

Assessment of the contractual cash flows derived solely from payments of principal and interest (continued)

Gains or losses on liabilities held for trading are recognized in the statement of profit or loss.

The Bank classifies all financial liabilities after initial recognition measured at amortized cost, except:

- Financial liabilities measured at fair value through profit or loss;
- Financial liabilities that arise when a transfer of a financial asset does not qualify for derecognition or when the continuing involvement approach is applied;
- Financial guarantee contracts;
- Commitment to providing loans at below market interest rates; or
- Contingent benefits recognized by the acquirer in the business combination.

(ii) Initial recognition

- Purchase or sale of financial assets that requires delivery of assets within a time frame established by regulation or convention in the market (regular purchase) is recognized on the settlement date.
- Financial assets and financial liabilities are initially recognized at fair value. For those financial assets or financial liabilities not measured at fair value through profit or loss, the fair value added/subtracted directly attributable transaction costs. The subsequent measurement of financial assets and financial liabilities depends on their classification.

**(ii) Pengakuan awal (lanjutan)**

Biaya transaksi hanya meliputi biaya-biaya yang dapat diatribusikan secara langsung untuk perolehan suatu aset keuangan atau penerbitan suatu liabilitas keuangan dan merupakan biaya tambahan yang tidak akan terjadi apabila instrumen keuangan tersebut tidak diperoleh atau diterbitkan.

Untuk aset keuangan, biaya transaksi ditambahkan pada jumlah yang diakui pada awal pengakuan aset, sedangkan untuk liabilitas keuangan, biaya transaksi dikurangkan dari jumlah utang yang diakui pada pengakuan awal liabilitas.

Biaya transaksi tersebut diamortisasi selama umur instrumen berdasarkan metode suku bunga efektif dan dicatat sebagai bagian dari pendapatan bunga untuk biaya transaksi sehubungan dengan aset keuangan atau sebagai bagian dari beban bunga untuk biaya transaksi sehubungan dengan liabilitas keuangan.

Bank pada pengakuan awal dapat menetapkan aset keuangan tertentu sebagai nilai wajar melalui laba rugi (opsi nilai wajar). Opsi nilai wajar dapat digunakan hanya bila memenuhi ketentuan sebagai berikut:

- Penetapan sebagai opsi nilai wajar mengurangi atau mengeliminasi inkonsistensi pengukuran dan pengakuan (*accounting mismatch*) yang dapat timbul;
- Aset keuangan merupakan bagian dari portofolio instrumen keuangan yang risikonya dikelola dan dilaporkan kepada manajemen kunci berdasarkan nilai wajar; atau
- Aset keuangan terdiri dari kontrak utama dan derivatif melekat yang harus dipisahkan.

Opsi nilai wajar digunakan untuk kredit. Jika tidak, kredit akan dicatat menggunakan biaya diamortisasi.

Opsi nilai wajar juga digunakan untuk dana investasi yang merupakan bagian dari portofolio yang dikelola dengan basis nilai wajar.

**2. SUMMARY OF MATERIAL ACCOUNTING POLICIES INFORMATION (continued)**

**b. Financial assets and financial liabilities (continued)**

**(ii) Initial recognition (continued)**

Transaction costs only include costs that are directly attributable to the acquisition of a financial asset or issuance of a financial liability and are incremental costs that would not have been incurred if the instrument had not been acquired or issued.

In the case of financial assets, transaction costs are added to the amount initially recognized, while for financial liabilities, transaction costs are deducted from the amount of debt initially recognized.

Such transactions costs are amortized over the terms of the instruments based on effective interest rate method and are recorded as part of interest income for transaction costs related to financial assets or as part of interest expense for transaction costs related to financial liabilities.

The bank may, at initial recognition, designate certain financial assets as fair value through profit or loss (fair value option). The fair value option can be used only if it meets the following provisions:

- Designation as fair value option reduces or eliminates measurement and recognition inconsistencies (accounting mismatches) that could arise;
- Financial assets are part of a financial instruments portfolio which risks are managed and reported to key management at fair value; or
- Financial assets consist of host contracts and embedded derivatives that must be separated.

The fair value option is used for certain loans. Otherwise, loans are recorded at amortized cost.

The fair value option is also used for investment funds that are part of a portfolio managed on a fair value basis.

(iii) Pengukuran selanjutnya

Aset keuangan dalam kelompok yang diukur pada nilai wajar melalui penghasilan komprehensif lain diukur pada nilai wajarnya dan perubahan atas nilai wajar tersebut dicatat pada penghasilan komprehensif lain.

Aset keuangan dan liabilitas keuangan yang diukur pada nilai wajar melalui laba rugi diukur pada nilai wajarnya dan perubahan diakui pada laba rugi.

Aset keuangan dan liabilitas keuangan yang diukur pada biaya perolehan diamortisasi diukur pada biaya perolehan diamortisasi dengan menggunakan metode suku bunga efektif dan menjadi subjek penurunan nilai. Keuntungan dan kerugian diakui dalam laba rugi pada saat aset dihentikan pengakuannya, dimodifikasi atau diturunkan nilainya.

(iv) Penghentian pengakuan

a. Aset keuangan (atau, sesuai dengan kondisinya, bagian dari aset keuangan atau bagian dari kelompok aset keuangan serupa) terutama dihentikan pengakuannya (yaitu, dihapuskan dari laporan posisi keuangan Bank) jika:

- Hak kontraktual atas arus kas yang berasal dari aset keuangan tersebut berakhir; atau
- Bank telah mengalihkan haknya untuk menerima arus kas yang berasal dari aset keuangan atau menanggung liabilitas untuk membayarkan arus kas yang diterima tersebut secara penuh tanpa penundaan berarti kepada pihak ketiga di bawah kesepakatan pelepasan (*pass-through arrangement*), dan antara (a) Bank telah mentransfer secara substansial seluruh risiko dan manfaat atas aset, atau (b) Bank tidak mentransfer maupun tidak memiliki secara substansial seluruh risiko dan manfaat atas aset, tetapi telah mentransfer kendali atas aset.

*Financial assets and financial liabilities at amortized cost are measured at amortized cost using the effective interest method and are subject to impairment. Gains and losses are recognized in profit or loss when the asset is derecognized, modified or impaired.*

(iv) Derecognition

a. *Financial assets (or, where applicable, a part of a financial asset or part of a group of similar financial assets) are primarily derecognized (i.e., removed from the Bank's consolidated statement of financial position) when:*

- *The contractual rights to receive cash flows from the financial assets have expired; or*
- *The Bank has transferred its rights to receive cash flows from the financial assets or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a pass-through arrangement, and either (a) the Bank has substantially transferred all the risks and rewards of the assets, or (b) the Bank has neither transferred nor retained substantially all risks and rewards of the assets, but has transferred control of the assets.*

Ketika Bank telah mengalihkan hak untuk menerima arus kas dari suatu aset atau telah menandatangani kesepakatan 'pass-through', Bank mengevaluasi jika, dan sejauh mana, Bank masih mempertahankan risiko dan manfaat atas kepemilikan aset. Ketika Bank tidak mengalihkan maupun seluruh risiko dan manfaat atas aset dipertahankan secara substansial, maupun tidak mengalihkan kendali atas aset, Bank tetap mengakui aset yang dialihkan sebesar keterlibatan berkelanjutan.

Bank melepaskan aset keuangan, seperti kredit yang diberikan, ketika syarat dan kondisi telah direnegosiasi hingga secara substansial, kredit yang diberikan tersebut menjadi baru, dengan perbedaan akan dicatat sebagai keuntungan atau kerugian dari pelepasan, jika kerugian penurunan nilai belum dicatat.

Kredit yang diberikan tersebut akan diklasifikasikan sebagai Stage 1 untuk penilaian *Expected Credit Losses* (ECL), kecuali kredit yang diberikan tersebut dianggap aset keuangan yang dibeli atau yang berasal dari aset keuangan memburuk (*Purchased or Originated Credit-Impaired Financial Assets - POCI*).

Jika modifikasi tidak akan menghasilkan arus kas yang secara substansi berbeda, maka modifikasi tidak akan berujung pada pelepasan aset. Berdasarkan perbedaan arus kas yang didiskonto pada *Effective Interest Rate* (EIR) awal, Bank akan mencatat keuntungan atau kerugian akibat modifikasi sampai dengan jumlah kerugian penurunan nilai yang belum diakui.

**(iv) Derecognition (continued)**

**a. Financial assets are primarily derecognized when (continued):**

When the Bank has transferred its rights to receive cash flows from an asset or has entered into a pass-through arrangement, it evaluates if, and to what extent, it has retained the risks and rewards of ownership. When it has neither transferred nor retained substantially all of the risks and rewards of the asset, nor transferred control of the asset, the Group continues to recognize the transferred asset to the extent of its continuing involvement.

The Bank disposes financial assets, such as loans, when the terms and conditions have been substantially renegotiated, the loans becomes new, with the difference will be recorded as gain or loss on disposal, if the impairment loss has not been recorded.

The loans will be classified as Stage 1 for the assessment of *Expected Credit Losses* (ECL), unless the loans are considered a purchased financial asset or originating from a deteriorating financial asset (*Purchased or Originated Credit-Impaired Financial Assets - POCI*).

If the modification will not result in a cash flow that is substantially different, then the modification will not result in the derecognition of the asset. Based on the difference in cash flow discounted at the initial *Effective Interest Rate* (EIR), Bank will record gains or losses resulting from modifications, up to the amount of impairment losses that have not been recognized.

(v) Pengakuan pendapatan dan beban

- a. Pendapatan dan beban bunga, untuk aset yang diukur pada nilai wajar melalui penghasilan komprehensif lain serta aset keuangan dan liabilitas keuangan yang dicatat berdasarkan biaya perolehan diamortisasi, diakui pada laporan laba rugi dan penghasilan komprehensif lain dengan menggunakan suku bunga efektif.
- b. Keuntungan dan kerugian yang timbul dari perubahan nilai wajar aset keuangan dan liabilitas keuangan yang diukur pada nilai wajar melalui laba rugi, diakui pada laporan laba rugi dan penghasilan komprehensif lain.
- c. Keuntungan dan kerugian yang timbul dari perubahan nilai wajar dan lainnya atas aset keuangan yang diklasifikasikan dalam kelompok nilai wajar melalui penghasilan komprehensif lain diakui secara langsung dalam ekuitas, kecuali keuntungan atau kerugian akibat perubahan nilai tukar dari item moneter, dihentikan pengakuannya atau adanya penurunan nilai dari aset keuangan tersebut.

Jumlah tercatat bruto aset keuangan adalah biaya perolehan diamortisasi aset keuangan sebelum disesuaikan dengan cadangan kerugian penurunan nilai.

Dalam menghitung pendapatan dan beban bunga, tingkat bunga efektif diterapkan pada jumlah tercatat bruto aset (ketika aset tersebut bukan aset keuangan memburuk) atau terhadap biaya perolehan diamortisasi dari liabilitas.

Untuk aset keuangan yang memburuk setelah pengakuan awal, pendapatan bunga dihitung dengan menerapkan tingkat bunga efektif terhadap biaya perolehan diamortisasi dari aset keuangan tersebut. Jika aset tersebut tidak lagi memburuk, maka perhitungan pendapatan bunga akan dihitung dengan menerapkan tingkat bunga efektif terhadap nilai tercatat bruto dari aset keuangan tersebut.

(v) Income and expense recognition

- a. Interest income and expenses, for assets measured at fair value through other comprehensive income and financial assets and financial liabilities carried at amortized cost, are recognized in the statement of profit or loss and other comprehensive income using the effective interest rate.
- b. Gains and losses arising from changes in fair value of financial assets and financial liabilities at fair value through profit or loss are recognized in the statement of profit or loss and other comprehensive income.
- c. Gains and losses arising from changes in fair value and other of financial assets classified as fair value through other comprehensive income are recognized directly in equity, except for gains or losses resulting from changes in the exchange rate of monetary items, derecognition or impairment of these financial assets.

The gross carrying amount of financial assets is the amortized cost of financial assets before adjusted with allowance for impairment losses.

In calculating interest income and expense, the effective interest rate is applied either to the gross carrying amount of the asset (when the asset is not a deteriorating financial asset) or to the amortized cost of the liability.

For financial assets that deteriorate after initial recognition, interest income is calculated by applying the effective interest rate to the amortized cost of the financial asset. If the asset is no longer deteriorating, then the interest income calculation will be calculated by applying the effective interest rate to the gross carrying amount of the financial asset.

Pada saat aset keuangan dihentikan pengakuannya atau terjadi penurunan nilai, maka keuntungan atau kerugian kumulatif yang sebelumnya diakui dalam ekuitas harus direklasifikasi ke laporan laba rugi dan penghasilan komprehensif lain.

(vi) Reklasifikasi aset keuangan

If the asset is no longer deteriorating, the the interest income calculation will continue to be calculated by applying the effective interest rate to the amortized cost of the financial asset.

When a financial asset is derecognized or impaired, the cumulative gains or losses previously recognized in equity should be reclassified to statement of profit or loss and other comprehensive income.

(vi) Reclassification of financial assets

Banks reclassify financial assets if, and only if, the business model for managing financial assets changes. There is no reclassification for financial liabilities.

(vii) Offsetting

Financial assets and financial liabilities are offset, and the net amount is reported in the statement of financial position if, and only if, there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the assets and settle the liabilities simultaneously.

The legally enforceable right must not be contingent on future events and must be enforceable in the normal course of business and in the event of default, insolvency or bankruptcy of the company or the counterparty.

**(viii) Pengukuran biaya diamortisasi**

Biaya perolehan diamortisasi dari aset keuangan atau liabilitas keuangan adalah jumlah aset keuangan atau liabilitas keuangan yang diukur pada saat pengakuan awal dikurangi pembayaran pokok pinjaman, ditambah atau dikurangi amortisasi kumulatif menggunakan metode suku bunga efektif yang dihitung dari selisih antara nilai pengakuan awal dan nilai jatuh temponya, dan dikurangi penurunan nilai.

**(ix) Pengukuran nilai wajar**

Nilai wajar adalah harga yang akan diterima untuk menjual suatu aset atau harga yang akan dibayar untuk mengalihkan suatu liabilitas dalam transaksi teratur antara pelaku pasar pada tanggal pengukuran.

Pengukuran nilai wajar mengasumsikan bahwa transaksi untuk menjual aset atau mengalihkan liabilitas terjadi:

- Di pasar utama untuk aset dan liabilitas tersebut; atau
- Jika tidak terdapat pasar utama, dipasar yang paling menguntungkan untuk aset atau liabilitas tersebut.

Nilai wajar suatu aset atau liabilitas diukur menggunakan asumsi yang akan digunakan pelaku pasar ketika menentukan harga aset dan liabilitas tersebut dengan asumsi bahwa pelaku pasar bertindak dalam kepentingan ekonomik terbaiknya.

Bank menggunakan teknik penilaian yang sesuai dalam keadaan dan dimana data yang memadai tersedia untuk mengukur nilai wajar, memaksimalkan penggunaan *input* yang dapat diobservasi yang relevan dan meminimalkan penggunaan *input* yang tidak dapat diobservasi.

**(viii) Amortized cost measurement**

The amortized cost of a financial asset or liability is the amount at which the financial asset or liability is measured at initial recognition, minus principal repayments, plus or minus the cumulative amortization using the effective interest rate method of any difference between the initial amount recognized and the maturity amount, minus any reduction for impairment.

**(ix) Fair value measurement**

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

The fair value measurement is based on the presumption that the transaction to sell an asset or paid to transfer a liability takes place either:

- In the principal market for the assets and liabilities; or
- In the absence of a principal market, in the most advantageous market for the asset or liability.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when determining the price of the asset and liability assuming that market participants act in their own economic best interest.

Bank uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs.

(ix) Pengukuran nilai wajar (lanjutan)

Semua aset dan liabilitas dimana nilai wajar diukur atau diungkapkan dalam laporan keuangan dapat dikategorikan pada level hierarki nilai wajar, berdasarkan tingkatan input terendah yang signifikan atas pengukuran nilai wajar secara keseluruhan:

- Level 1: harga kuotasian (tanpa penyesuaian) di pasar aktif untuk aset atau liabilitas yang identik yang dapat diakses pada tanggal pengukuran.
- Level 2: *input* selain harga kuotasian yang termasuk dalam level 1 yang dapat diobservasi untuk aset dan liabilitas, baik secara langsung atau tidak langsung.
- Level 3: *input* yang tidak dapat diobservasi untuk aset dan liabilitas.

Untuk aset dan liabilitas yang diakui pada laporan keuangan secara berulang, Bank menentukan apakah terjadi transfer antara level di dalam hirarki dengan cara mengevaluasi kategori berdasarkan *input* level terendah yang signifikan dalam pengukuran nilai wajar setiap akhir periode pelaporan.

Bank untuk tujuan pengungkapan nilai wajar, telah menentukan kelas aset dan liabilitas berdasarkan sifat, karakteristik, risiko aset dan liabilitas, dan level hierarki nilai wajar (Catatan 34).

**c. Transaksi dengan pihak-pihak berelasi**

Bank melakukan transaksi dengan pihak-pihak berelasi seperti yang didefinisikan dalam PSAK 224 (Sebelumnya PSAK 7) tentang "Pengungkapan Pihak-pihak Berelasi".

Suatu pihak dianggap pihak berelasi dengan Bank jika:

- (1) Secara langsung, atau tidak langsung yang melalui satu atau lebih perantara, suatu pihak (i) mengendalikan, atau dikendalikan oleh, atau berada di bawah pengendalian bersama, dengan Bank; (ii) memiliki kepentingan dalam Bank yang memberikan pengaruh signifikan atas Bank; atau (iii) memiliki pengendalian bersama atas Bank;

**2. SUMMARY OF MATERIAL ACCOUNTING POLICIES INFORMATION (continued)**

**b. Financial assets and financial liabilities (continued)**

(ix) Fair value measurement (continued)

All assets and liabilities for which fair value is measured or disclosed in the financial statements are classified within fair value hierarchy, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1: quoted (unadjusted) market prices in active markets for identical assets or liabilities accessible at the measurement date.
- Level 2: inputs other than quoted prices included in level 1 for the asset and liability, which is directly or indirectly observable.
- Level 3: unobservable inputs for the asset and liability.

For assets and liabilities that are recognised in the financial statements on a recurring basis, Bank determines whether transfers have occurred between levels in the hierarchy by re-assessing categorisation based on the lowest level input that is significant to the fair value measurement as a whole at the end of each reporting period.

For the fair value disclosures purposes, Bank has determined classes of assets and liabilities based on the nature, characteristics, risks of the asset and liability, and the level of the fair value hierarchy (Note 34).

**d. Cadangan kerugian penurunan nilai atas aset keuangan (lanjutan)**

Bank mengukur cadangan kerugian sejumlah kerugian kredit ekspektasian sepanjang umurnya, kecuali untuk hal berikut, diukur sejumlah kerugian kredit ekspektasian 12 (dua belas) bulan:

- Instrumen utang yang memiliki risiko kredit rendah pada tanggal pelaporan; dan
- Instrumen keuangan lainnya yang risiko kreditnya tidak meningkat secara signifikan sejak pengakuan awal.

Bank menganggap instrumen utang memiliki risiko kredit yang rendah ketika peringkat risiko kreditnya setara dengan definisi *investment grade* yang dipahami secara global.

Kerugian kredit ekspektasian 12 (dua belas) bulan adalah bagian dari kerugian kredit ekspektasian sepanjang umurnya yang merepresentasikan kerugian kredit ekspektasian yang timbul dari peristiwa gagal bayar instrumen keuangan yang mungkin terjadi dalam 12 (dua belas) bulan setelah tanggal pelaporan.

Kerugian yang terjadi diakui pada laporan laba rugi dan penghasilan komprehensif lain dan dicatat pada akun penyisihan kerugian penurunan nilai sebagai pengurang terhadap aset keuangan yang dicatat pada biaya perolehan diamortisasi. Jika pada suatu periode berikutnya, jumlah kerugian penurunan nilai berkurang dan pengurangan tersebut dapat dikaitkan secara objektif pada peristiwa yang terjadi setelah penurunan nilai diakui (seperti meningkatnya peringkat kredit debitur atau penerbit), maka kerugian penurunan nilai yang sebelumnya diakui harus dipulihkan, dengan menyesuaikan akun cadangan. Jumlah pemulihan aset keuangan diakui pada laporan laba rugi dan penghasilan komprehensif lain pada periode berjalan.

Kerugian kredit ekspektasian untuk instrumen utang yang diukur pada nilai wajar tidak mengurangi nilai tercatat di dalam aset keuangan di laporan posisi keuangan, yaitu nilai wajar. Kerugian kredit ekspektasian diakui sebagai penambah dari penghasilan komprehensif lainnya di dalam laporan posisi keuangan.

**d. Allowance for impairment losses on financial assets (continued)**

*The Bank measures the allowance for losses for the lifetime of an expected credit losses, except for the following, which are measured for 12 (twelve) months expected credit losses:*

- *Debt instruments that have a low credit risk at the reporting date; and*
- *Other financial instruments whose credit risk has not increased significantly since initial recognition.*

*The Bank consider debt instruments to have low credit risk when their credit risk rating is equivalent to the globally understood definition of investment grade.*

*The 12 (twelve) months expected credit losses are part of expected credit losses over their lifespan that represent expected credit losses arising from financial instrument defaults that may occur within 12 (twelve) months after the reporting date.*

*Losses are recognized in the statement of profit or loss and other comprehensive income and recorded in an allowance for impairment losses account as a deduction for financial assets carried at amortized cost. If in a subsequent period, the amount of the impairment loss decreases and the reduction can be attributed objectively to events occurring after the impairment has been recognized (such as an increase in the credit rating of the debtor or issuer), the previously recognized impairment loss should be recovered, by adjusting the allowance account. The recoverable amount of financial assets is recognized in the statement of profit or loss and other comprehensive income in the current period.*

*The expected credit loss for debt instruments measured at fair value does not reduce the carrying value of the financial asset in the statements of financial position, which is the fair value. Expected credit losses are recognized as an addition to other comprehensive income in the statement of financial position.*

Instrumen ekuitas yang diukur pada nilai wajar tidak dilakukan penilaian penurunan nilai sesuai PSAK 109 (sebelumnya PSAK 71).

Penerimaan kembali atas aset keuangan yang telah dihapusbukukan pada tahun berjalan dikreditkan dengan menyesuaikan akun cadangan kerugian penurunan nilai. Penerimaan kembali atas aset keuangan yang telah dihapusbukukan pada tahun-tahun sebelumnya dicatat sebagai pendapatan operasional selain bunga.

Pengukuran kerugian kredit ekspektasian

Kerugian kredit ekspektasian adalah estimasi probabilitas tertimbang dari kerugian kredit yang diukur sebagai berikut:

- Aset keuangan yang tidak memburuk pada tanggal pelaporan, kerugian kredit ekspektasian diukur sebesar selisih antara nilai kini dari seluruh kekurangan kas (yaitu selisih antara arus kas yang terutang kepada Bank sesuai dengan kontrak dan arus kas yang diperkirakan akan diterima oleh Bank);
- Aset keuangan yang memburuk pada tanggal pelaporan, kerugian kredit ekspektasian diukur sebesar selisih antara jumlah tercatat bruto dan nilai kini arus kas masa depan yang diestimasi;
- Komitmen pinjaman yang belum ditarik, kerugian kredit ekspektasian diukur sebesar selisih antara nilai kini jumlah arus kas jika komitmen ditarik dan arus kas yang diperkirakan akan diterima oleh Bank; dan
- Kontrak jaminan keuangan, kerugian kredit ekspektasian diukur sebesar selisih antara pembayaran yang diperkirakan untuk mengganti pemegang atas kerugian kredit yang terjadi dikurangi jumlah yang diperkirakan dapat dipulihkan.

Aset keuangan yang direstrukturisasi

Jika ketentuan aset keuangan dinegosiasikan ulang atau dimodifikasi atau aset keuangan yang ada diganti dengan yang baru karena kesulitan keuangan peminjam, maka dilakukan penilaian apakah aset keuangan yang ada harus dihentikan pengakuannya dan kerugian kredit ekspektasian diukur sebagai berikut:

**2. SUMMARY OF MATERIAL ACCOUNTING POLICIES INFORMATION (continued)**

**d. Allowance for impairment losses on financial assets (continued)**

Equity instruments measured at fair value are not assessed for impairment in accordance with SFAS 109 (Previously SFAS 71).

Recoveries of financial assets written-off in the current year, is credited by adjusting the allowance for impairment losses account. Recoveries of financial assets written-off in the previous years are recorded as operating income other than interest.

Measurement of expected credit losses

The expected credit losses are the weighted probability estimation of credit losses measured as follows:

- Financial assets that have not deteriorated at the reporting date, expected credit losses are measured at the difference between the present value of all cash shortages (the difference between cash flows owed to the Bank in accordance with the contract and cash flows that are expected to be received by the Bank);
- Financial assets that have deteriorated at the reporting date, expected credit losses are measured at the difference between the gross carrying amount and the present value of estimated future cash flows;
- Unused/undrawn loan commitments, expected credit losses are measured at the difference between the present value of the total cash flows if the commitments are withdrawn and the cash flows expected to be received by the Bank; and
- Financial guarantee contracts, expected credit losses are measured at the difference between payments estimated to replace the holders for credit losses incurred less the amount that is expected to be recoverable.

Restructured financial assets

If the terms of financial assets are renegotiated or modified or existing financial assets are replaced with new ones because of the borrower's financial difficulties, an assessment is made of whether the existing financial assets should be derecognized and the expected credit losses are measured as follows:

Aset keuangan yang direstrukturisasi (lanjutan)

- Jika restrukturisasi tidak mengakibatkan penghentian pengakuan aset yang ada, maka arus kas yang diperkirakan timbul dari aset keuangan yang dimodifikasi dimasukkan dalam perhitungan kekurangan kas dari aset yang ada.
- Jika restrukturisasi akan menghasilkan penghentian pengakuan aset yang ada, maka nilai wajar aset baru diperlakukan sebagai arus kas akhir dari aset keuangan yang ada pada saat penghentian pengakuannya. Jumlah ini dimasukkan dalam perhitungan kekurangan kas dari aset keuangan yang ada yang didiskontokan dari tanggal penghentian pengakuan ke tanggal pelaporan menggunakan suku bunga efektif awal dari aset keuangan yang ada.

Aset keuangan yang memburuk

Pada setiap tanggal pelaporan, Bank menilai apakah aset keuangan yang dicatat pada biaya perolehan diamortisasi dan aset keuangan instrumen utang yang dicatat pada nilai wajar melalui penghasilan komprehensif lain mengalami penurunan nilai kredit (memburuk). Aset keuangan memburuk ketika satu atau lebih peristiwa yang memiliki dampak merugikan atas estimasi arus kas masa depan dari aset keuangan telah terjadi.

Bukti bahwa aset keuangan mengalami penurunan nilai kredit (memburuk) termasuk data yang dapat diobservasi mengenai peristiwa berikut ini:

- (1) Kesulitan keuangan signifikan yang dialami penerbit atau pihak peminjam;
- (2) Pelanggaran kontrak, seperti peristiwa gagal bayar atau peristiwa tunggakan;
- (3) Pihak pemberi pinjaman, untuk alasan ekonomik atau kontraktual sehubungan dengan kesulitan keuangan yang dialami pihak peminjam, telah memberikan konsesi pada pihak peminjam yang tidak mungkin diberikan jika pihak peminjam tidak mengalami kesulitan tersebut;
- (4) Terjadi kemungkinan bahwa pihak peminjam akan dinyatakan pailit atau melakukan reorganisasi keuangan lainnya;

Restructured financial assets (continued)

- If the restructuring does not result in derecognition of the existing asset, the estimated cash flows arising from the modified financial asset are included in the calculation of the cash deficiency of the existing asset.
- If the restructuring will result in derecognition of an existing asset, the fair value of the new asset is treated as the final cash flows of the existing financial asset on derecognition. This amount is included in the calculation of the cash shortage of the existing financial asset which is discounted from the derecognition date to the reporting date using the initial effective interest rate of the existing financial asset.

Deteriorating financial assets

At each reporting date, the Bank assesses whether financial assets carried at amortized cost and debt financial assets carried at fair value through other comprehensive income are impaired (deteriorated). A financial asset deteriorates when one or more events that have an adverse effect on the estimated future cash flows of the financial asset have occurred.

Evidence that a financial asset is credit impaired (deteriorating) includes observable data regarding the following events:

- (1) Significant financial difficulties experienced by the issuer or borrower;
- (2) Breach of contract, such as an event of default or arrears;
- (3) The lender, for economic or contractual reasons in connection with the borrower's financial difficulties, has given the borrower a concession that would not have been possible if the borrower had not experienced such difficulties;
- (4) There is a possibility that the borrower will enter bankruptcy or other financial reorganization;

Aset keuangan yang memburuk (lanjutan)

Bukti bahwa aset keuangan mengalami penurunan nilai kredit (memburuk) termasuk data yang dapat diobservasi mengenai peristiwa berikut ini (lanjutan):

- (5) Hilangnya pasar aktif dari aset keuangan akibat kesulitan keuangan;
- (6) Pembelian atau penerbitan aset keuangan dengan diskon sangat besar yang mencerminkan kerugian kredit yang terjadi; atau
- (7) Sulit untuk mengidentifikasi peristiwa diskrit tunggal, namun demikian, dampak kombinasi dari beberapa peristiwa dapat menyebabkan aset keuangan mengalami penurunan nilai kredit.

Aset keuangan yang dibeli atau yang berasal dari aset keuangan memburuk

Aset keuangan dikategorikan sebagai POCI apabila terdapat bukti objektif penurunan nilai pada saat pengakuan awal. Pada saat pengakuan awal, tidak ada penyisihan kerugian kredit yang diakui karena harga pembelian atau nilainya telah termasuk estimasi kerugian kredit sepanjang umurnya. Selanjutnya, perubahan kerugian kredit sepanjang umurnya, baik positif atau negatif, diakui dalam laporan laba rugi sebagai bagian dari penyisihan kerugian kredit.

Berdasarkan proses di atas, Bank melakukan pembagian aset keuangan atas *Stage 1*, *Stage 2*, *Stage 3* dan POCI, sebagai berikut:

- *Stage 1*: mencakup instrumen keuangan yang tidak memiliki peningkatan risiko kredit secara signifikan sejak pengakuan awal atau memiliki risiko kredit rendah pada tanggal pelaporan. Untuk instrumen-instrumen keuangan ini, akan berlaku perhitungan ECL 12 bulan. Aset keuangan didalam *Stage 1* termasuk fasilitas dimana risiko kredit telah membaik dan aset keuangan dapat direklasifikasi dari *Stage 2*.

Deteriorating financial assets (continued)

*Evidence that a financial asset is credit impaired (deteriorating) includes observable data regarding the following events (continued):*

- (5) *The disappearance of an active market for a financial asset due to financial difficulties;*
- (6) *The purchase or issuance of financial assets at a deep discount that reflects the credit losses incurred; or*
- (7) *It is difficult to identify a single discrete event, however, the combined effect of several events can cause a financial asset to be impaired on credit.*

Purchased or originated credit-impaired financial assets (POCI)

*A financial asset is categorized as POCI if there is objective evidence of impairment at initial recognition. At initial recognition, no allowance for credit losses is recognized because the purchase price or value includes the estimated lifetime credit losses. Furthermore, changes in credit losses over their lifetime, whether positive or negative, are recognized in the income statement as part of the allowance for credit losses.*

*Based on the above process, the Bank distributes financial assets into Stage 1, Stage 2, Stage 3 and POCI, as follows:*

- *Stage 1: includes financial instruments that do not have a significant increase in credit risk since initial recognition or have low credit risk at the reporting date. For these financial instruments a 12 (twelve) months ECL calculation will apply. Financial assets in Stage 1 include facilities where credit risk has improved and financial assets that can be reclassified from Stage 2.*

Aset keuangan yang dibeli atau yang berasal dari aset keuangan memburuk (lanjutan)

Berdasarkan proses di atas, Bank melakukan pembagian aset keuangan atas Stage 1, Stage 2, Stage 3 dan POCI, sebagai berikut (lanjutan):

- Stage 2: mencakup instrumen keuangan yang mengalami peningkatan risiko kredit sejak pengakuan awal (kecuali Bank merasa risiko kredit tergolong rendah pada tanggal pelaporan) namun belum terbukti adanya bukti penurunan nilai secara objektif. Untuk instrumen-instrumen ini, akan berlaku perhitungan ECL seumur hidup. ECL seumur hidup adalah kerugian kredit ekspektasian yang diharapkan dari semua kejadian gagal bayar yang mungkin terjadi selama perkiraan umur dari instrumen keuangan tersebut. Stage 2 juga mencakup fasilitas dimana risiko kredit telah membaik dan aset keuangan telah direklasifikasi dari Stage 3.
- Stage 3: mencakup instrumen keuangan yang telah terbukti mengalami penurunan nilai secara objektif pada tanggal pelaporan. Kelompok ini biasanya terdiri atas debitur yang mengalami gagal bayar. Bank mencatat cadangan ECL seumur hidup.
- POCI: aset POCI adalah aset keuangan yang mengalami penurunan nilai berdasarkan penilaian risiko kredit pada saat pengakuan awal. Aset tersebut dicatat pada nilai wajar pada saat pengakuan awal, dan pendapatan bunga akan diakui selanjutnya berdasarkan metode suku bunga efektif yang disesuaikan. Cadangan ECL hanya dicatat atau dilepaskan jika ada perubahan selanjutnya pada kerugian kredit ekspektasian.

Bank menghitung penurunan nilai melalui dua metode, yaitu penurunan nilai secara individual atau kolektif. Perhitungan penurunan nilai secara individual dilakukan untuk aset keuangan yang signifikan, yaitu dengan total eksposur aset keuangan yang bernilai signifikan dan *non performing loan*. Selain itu, perhitungan penurunan nilai akan dilakukan secara kolektif.

**2. SUMMARY OF MATERIAL ACCOUNTING POLICIES INFORMATION (continued)**

Purchased or originated credit-impaired financial assets (POCI) (continued)

Based on the above process, the Bank distributes financial assets into Stage 1, Stage 2, Stage 3 and POCI, as follows (continued):

- Stage 2: includes financial instruments that experience an increase in credit risk since initial recognition (unless the Bank feel that credit risk is classified as low at the reporting date) but there is no objective evidence of impairment yet. For these instruments, lifetime ECL calculations will apply. Lifetime ECL is the expected credit loss expected from all default events that may occur during the estimated life of the financial instrument. Stage 2 also includes facilities where credit risk has improved and financial assets have been reclassified from Stage 3.
- Stage 3: includes financial instruments that have been proved to be objectively impaired at the reporting date. This group usually consists of debtors who have defaulted on their payments. The bank records lifetime ECL reserves.
- POCI: POCI assets are financial assets that are impaired based on a credit risk assessment on initial recognition. Such assets are carried at fair value on initial recognition, and interest income is recognized subsequently using the adjusted effective interest rate method. ECL reserves are only recorded or released if there are further changes to expected credit losses.

The Bank calculates impairment through two methods, which is individual or collective impairment. Individual impairment calculations are performed for significant financial assets, with total exposure to financial assets with significant amount and non performing loan. Other than that, the calculation of impairment will be carried out collectively.

Penurunan nilai individual

Perhitungan penurunan nilai secara individual dilakukan untuk aset keuangan yang signifikan dengan pembuatan skenario menggunakan metode *discounted cash flow* yang menggambarkan kondisi perusahaan terkait.

Penurunan nilai kolektif

Evaluasi penurunan nilai secara kolektif didasarkan pada konsep *Probability of Default* (PD), *Loss Given Default* (LGD) dan *Exposure at Default* (EAD) yang mempertimbangkan informasi masa lalu, terkini, dan masa mendatang.

Bank menggunakan metode *Historical balance* dalam menentukan nilai LGD dari setiap debitur. LGD menggambarkan persentase nominal fasilitas yang tidak akan dapat dipulihkan oleh Bank terhadap debitur *default*. LGD biasa dihitung dengan *1-Recovery Rate*. *Recovery rate* dihitung mempertimbangkan *Time Value of Money* dari pengembalian dari kewajiban yang telah *default*. Tingkat suku bunga yang digunakan untuk menghitung *Time Value of Money* dari *Recovery* adalah EIR awal.

EAD merupakan estimasi nilai buku pada saat terjadi gagal bayar, dengan mempertimbangkan arus kas instrumen keuangan terkait, serta kemungkinan penarikan tambahan dari limit kredit sampai dengan tanggal gagal bayar.

EAD juga mempertimbangkan jadwal pembayaran dan amortisasi serta perubahan dalam utilisasi saldo yang belum ditarik menjelang terjadinya kegagalan bayar.

Pengukuran ECL berdasarkan PSAK 109 (Sebelumnya PSAK 71) mewajibkan Bank untuk memodelkan ECL sesuai dengan skenario *forward-looking* yang ada, dengan mempertimbangkan kemungkinan ekonomi baik dan buruk. Oleh karena itu, nilai ECL yang dihasilkan Bank harus berdasarkan hasil probabilitas dari tiga skenario (kasus ekonomi normal, baik dan buruk). PD akan dihitung menurut tiga skenario dengan nilai makro-ekonomi sesuai dengan skenario-skenario tersebut.

**2. SUMMARY OF MATERIAL ACCOUNTING POLICIES INFORMATION (continued)**

**d. Allowance for impairment losses on financial assets (continued)**

Individual impairment

The calculation of individual impairment for significant assets is using discounted cash flow that reflects the company condition.

Collective impairment

Collective impairment evaluation is based on the concepts of *Probability of Default* (PD), *Loss Given Default* (LGD) and *Exposure at Default* (EAD) which take into account past, current, and future information.

The Bank uses the *Historical Balance* method in determining the LGD value of each debtor. LGD describes the nominal percentage of the facility that the Bank will not be able to recover from the default debtor. The usual LGD is calculated at *1-Recovery Rate*. The recovery rate is calculated by considering the *Time Value of Money* from the return of the default obligation. The interest rate used to calculate the *Time Value of Money* from *Recovery* is the initial EIR.

EAD is an estimate of the book value at the time of default, taking into account the cash flows of the related financial instrument, as well as the possibility of additional withdrawals from the credit limit up to the date of default.

EAD also considers payment and amortization schedules as well as changes in the utilization of outstanding balances prior to default.

The measurement of ECL based on SFAS 109 (Previously SFAS 71) requires the Bank to model the ECL according to the existing forward-looking scenario, taking into account good and bad economic possibilities. Therefore, the ECL value generated by the Bank must be based on the probability results of three scenarios (normal, good and bad economic cases). PD will be calculated according to three scenarios with macro-economic values in accordance with these scenarios.

Allowance for expected credit losses is presented in the statement of financial position as follows:

- Loan commitments and financial guarantee contracts, generally the allowance for expected credit losses is presented as a provision;
- Financial instruments that include components of loan commitments that have been drawn and not yet drawn, and the Bank is unable to identify expected credit losses from loan commitment components that have been drawn separately from the undisbursed components of loan commitments, then the allowance for expected credit losses is combined and presented as a deduction of the gross carrying amount. Any excess of allowance for expected credit losses over the gross amount is presented as a provision; and
- For debt instruments measured at fair value through other comprehensive income, allowance for expected credit losses is not recognized in the statement of financial position because the carrying amount of these assets is their fair value. However, the allowance for expected credit losses is disclosed and recognized in other comprehensive income, the fair value component.

Penghapusan

Pinjaman dan instrumen hutang dihapusbukukan ketika tidak ada prospek yang realistis untuk memulihkan aset keuangan secara keseluruhan atau secara parsial. Hal ini pada umumnya terjadi ketika Bank menentukan bahwa peminjam tidak memiliki aset atau sumber penghasilan yang dapat menghasilkan arus kas yang cukup untuk membayar jumlah yang dihapusbukukan.

Namun demikian, aset keuangan yang dihapusbukukan masih bisa dilakukan tindakan penyelamatan sesuai dengan prosedur Bank dalam rangka pemulihan jumlah yang jatuh tempo.

Sehubungan dengan kepatuhan terhadap Bank Indonesia dan Otoritas Jasa Keuangan (OJK), Bank menerapkan Peraturan Otoritas Jasa Keuangan No. 40/POJK.03/2019 tanggal 19 Desember 2019 tentang "Penilaian Kualitas Aset Bank Umum".

- (i) transaksi pertukaran tidak memiliki substansi komersial; atau
- (ii) nilai wajar dari aset yang diterima dan diserahkan tidak dapat diukur secara andal.

Penyusutan aset dimulai pada saat aset tersebut siap untuk digunakan sesuai maksud penggunaannya dan dihitung dengan menggunakan metode garis lurus berdasarkan estimasi umur manfaat ekonomis sebagai berikut:

| <u>Tahun/ Years</u>               |    |                                       |

Jumlah tercatat komponen dari suatu aset tetap dihentikan pengakuannya pada saat dilepaskan atau saat sudah tidak ada lagi manfaat ekonomik masa depan yang diekspektasikan dari penggunaan maupun pelepasannya. Laba atau rugi yang timbul dari penghentian pengakuan tersebut dimasukkan kedalam laba rugi untuk tahun dimana penghentian pengakuan tersebut dilakukan.

The carrying amount of an item of premises and equipments is derecognized upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising from the derecognition of the asset is directly included in the profit or loss when the item is derecognized.

The asset residual value, useful life, and depreciation method are evaluated at each year end and adjusted prospectively, if necessary.

If the cost of land includes the costs of site dismantlement, removal and restoration, and the benefits from the site dismantlement, removal and restoration is limited, that cost is depreciated over the period of benefits obtained. In some cases, the land itself may have a limited useful life, in which case it is depreciated in a manner that reflects the benefits to be derived from it.

Increase in the carrying amount arising from revaluation is recorded in "Revaluation Surplus arising from Premises and Equipment" and presented in other comprehensive income. However, the increase is recognized in profit or loss, to the extent of the amount of impairment of the same assets due to revaluation previously recognized in profit or loss. A decrease in the carrying amount arising from the revaluation is recognized in profit or loss.

At the inception date of a contract, the Bank assesses whether a contract is, or contains, a lease. That is, if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. To assess whether a contract provides the right to control an identifying asset, the Bank assesses whether:

Right-of-use assets are measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any remeasurement of lease liabilities. The cost of right-of-use assets includes the amount of lease liabilities recognized, initial direct costs incurred, and lease payments made at or before the commencement date less any lease incentives received.

**k. Aset tetap, aset hak guna dan liabilitas sewa serta aset tidak berwujud (lanjutan)**

Aset hak guna dan liabilitas sewa (lanjutan)

Setelah tanggal permulaan, aset hak-guna diukur dengan model biaya. Aset hak-guna diukur sebesar harga perolehan dikurangi akumulasi depresiasi dan akumulasi penurunan nilai serta disesuaikan dengan pengukuran kembali liabilitas sewa. Liabilitas sewa diukur pada biaya perolehan diamortisasi menggunakan metode suku bunga efektif. Bunga inkremental sewa mengacu pada tingkat suku bunga obligasi pemerintah.

Sewa jangka pendek dengan durasi kurang dari 12 (dua belas) bulan dan sewa aset bernilai rendah, serta elemen-elemen sewa tersebut, sebagian atau seluruhnya tidak menerapkan prinsip-prinsip pengakuan yang ditentukan oleh PSAK 116 (Sebelumnya PSAK 73). Bank akan mengakui pembayaran sewa tersebut dengan dasar garis lurus selama masa sewa dalam laporan laba rugi dan penghasilan komprehensif lain. Beban ini disajikan pada beban umum dan administrasi dalam laporan laba rugi.

Aset takberwujud

Aset takberwujud terdiri dari perangkat lunak yang dibeli Bank, yang bukan merupakan bagian integral dari perangkat keras yang terkait.

Aset tidak berwujud diakui jika, atau hanya jika, biaya perolehan aset tersebut dapat diukur secara andal dan kemungkinan besar Bank akan memperoleh manfaat ekonomis masa depan dari aset tersebut.

Aset takberwujud dicatat sebesar biaya perolehan dikurangi akumulasi amortisasi dan akumulasi kerugian penurunan nilai.

Amortisasi diakui dalam laba rugi dengan menggunakan metode garis lurus berdasarkan taksiran masa manfaat ekonomis selama 5 (lima) tahun, dimulai dari pada saat aset takberwujud tersebut siap untuk digunakan sesuai dengan maksud penggunaannya.

**2. SUMMARY OF MATERIAL ACCOUNTING POLICIES INFORMATION (continued)**

**k. Premises and equipments, right-of-use assets and lease liabilities and intangible assets (continued)**

Right-of-use assets and lease liabilities (continued)

After the inception date, the right-of-use assets are measured using the cost model. Right-of-use assets are measured at cost less accumulated depreciation and accumulated impairment losses and adjusted with remeasurement of lease liabilities. Lease liabilities are measured at amortized cost using the effective interest method. Lease incremental interest rate refers to the interest rates on government bonds.

Short-term leases with a duration less than 12 (twelve) months and leases with low value assets, as well as elements of such leases, partially or entirely do not apply the recognition principles stipulated by SFAS 116 (Previously SFAS 73). The Bank will recognize lease payments on a straight-line basis over the lease term in the statement of profit or loss and other comprehensive income. These expenses are presented under general and administrative expenses in the income statement.

Intangible assets

Intangible assets consist of software purchased by the Bank that is not an integral part of a related hardware.

Intangible assets are recognized if, and only if, when its cost can be measured reliably and it is probable that expected future benefits that are attributable to it will flow to the Bank.

Intangible assets are stated at cost less accumulated amortization and accumulated impairment losses.

Amortization is recognized in profit or loss using the straight line method based on the estimated useful life of 5 (five) years, starting when the intangible assets are ready to be used in accordance with the intended use.

**k. Aset tetap, aset hak guna dan liabilitas sewa serta aset tidak berwujud (lanjutan)**

Aset hak guna dan liabilitas sewa (lanjutan)

Nilai residu, umur manfaat, dan metode amortisasi ditelaah setiap akhir tahun dan disesuaikan, jika diperlukan.

Aset tidak berwujud dihentikan pengakuannya pada saat pelepasan (yaitu, pada tanggal penerima memperoleh kendali) atau ketika tidak ada manfaat ekonomi masa depan yang diharapkan dari penggunaan atau pelepasannya. Keuntungan atau kerugian yang timbul dari penghentian pengakuan aset (dihitung sebagai perbedaan antara hasil pelepasan neto dan jumlah tercatat aset) dimasukkan dalam laporan laba rugi.

**l. Penurunan nilai aset non-keuangan**

Pada setiap tanggal pelaporan, Bank menilai apakah terdapat indikasi suatu aset mengalami penurunan nilai. Jika terdapat indikasi tersebut atau pada saat pengujian tahunan atas penurunan nilai aset tertentu (yaitu aset takberwujud dengan umur manfaat tidak terbatas, aset takberwujud yang belum dapat digunakan, atau *goodwill* yang diperoleh dalam suatu kombinasi bisnis) diperlukan, maka Bank akan membuat estimasi atas jumlah terpulihkan aset tersebut.

Jumlah terpulihkan yang ditentukan untuk aset individual adalah jumlah yang lebih tinggi antara nilai wajar aset atau Unit Penghasil Kas (UPK) dikurangi biaya untuk menjual dengan nilai pakainya, kecuali aset tersebut tidak menghasilkan arus kas masuk yang sebagian besar independen dari aset atau kelompok aset lain. Jika nilai tercatat aset atau UPK lebih besar daripada jumlah terpulihkannya, maka aset tersebut dipertimbangkan mengalami penurunan nilai dan nilai tercatat aset diturunkan menjadi sebesar nilai terpulihkannya.

**2. SUMMARY OF MATERIAL ACCOUNTING POLICIES INFORMATION (continued)**

**k. Premises and equipments, right-of-use assets and lease liabilities and intangible assets (continued)**

Right-of-use assets and lease liabilities (continued)

The residual value, useful life, and amortization method are reviewed at the end of each year and adjusted, if necessary.

An intangible asset is derecognized upon disposal (i.e., at the date the recipient obtains control) or when no future economic benefits are expected from its use or disposal. Any gain or loss arising upon derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the statement of profit or loss.

**l. Impairment of non-financial assets**

The Bank assesses at each reporting date whether there is an indication that an asset may be impaired. If such indication exists, or when annual impairment testing for an asset (i.e. an intangible asset with an indefinite useful life, an intangible asset not yet available for use, or goodwill acquired in a business combination) is required, Bank will make an estimation of the asset's recoverable amount.

An asset's recoverable amount for individual asset is the higher of an asset's or Cash Generating Unit (CGU)'s fair value less costs to sell and its value in use, unless the asset does not generate cash inflows that are largely independent from other assets or groups of assets. Where the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is recorded to its recoverable amount.

**l. Penurunan nilai aset non-keuangan (lanjutan)**

Kerugian penurunan nilai dari operasi yang berkelanjutan, jika ada, diakui pada laba rugi sebagai "rugi penurunan nilai" sesuai dengan kategori biaya yang konsisten dengan fungsi dari aset yang diturunkan nilainya. Dalam menghitung nilai pakai, estimasi arus kas masa depan neto didiskontokan ke nilai kini dengan menggunakan tingkat diskonto sebelum pajak yang menggambarkan penilaian pasar kini atas nilai waktu uang dan risiko spesifik aset.

Dalam menentukan nilai wajar dikurangi biaya pelepasan, mengacu pada PSAK 113 (Sebelumnya PSAK 68) tentang "Pengukuran Nilai Wajar" (Catatan 2b).

Pengukuran nilai wajar aset non-keuangan memperhitungkan kemampuan pelaku pasar untuk menghasilkan manfaat ekonomi dengan menggunakan aset dalam penggunaan tertinggi dan terbaiknya atau dengan menjualnya kepada pelaku pasar lain yang akan menggunakan aset tersebut dalam penggunaan tertinggi dan terbaiknya.

Kerugian penurunan nilai dari operasi yang berkelanjutan, jika ada, diakui pada laporan laba rugi dan penghasilan komprehensif lain sesuai dengan kategori biaya yang konsisten dengan fungsi aset yang diturunkan nilainya.

**m. Agunan yang diambil alih**

Agunan yang diambil alih sehubungan dengan penyelesaian kredit diakui sebesar nilai neto yang dapat direalisasi atau sebesar nilai tercatat dari kredit, mana yang lebih rendah. Nilai neto yang dapat direalisasi adalah nilai wajar agunan setelah dikurangi estimasi biaya pelepasan. Kelebihan saldo kredit yang diberikan, yang belum dilunasi oleh peminjam diatas nilai dari agunan yang diambil alih, dibebankan sebagai penyisihan penghapusan aset pada tahun berjalan.

Selisih antara nilai agunan yang diambil alih dengan hasil penjualannya diakui sebagai keuntungan atau kerugian pada saat penjualan agunan.

Bank mengevaluasi nilai agunan yang diambil alih secara berkala. Penyisihan kerugian agunan yang diambil alih dibentuk berdasarkan penurunan nilai agunan yang diambil alih.

**2. SUMMARY OF MATERIAL ACCOUNTING POLICIES INFORMATION (continued)**

**l. Impairment of non-financial assets (continued)**

*Impairment losses of continuing operations are recognized in the statement of profit or loss as "impairment losses" in those expense categories consistent with the functions of the impaired asset. In assessing the value in use, the estimated net future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset.*

*In determining fair value less costs of disposal, refer to SFAS 113 (Previously SFAS 68) on "Fair Value Measurements" (Note 2b).*

*A fair value measurement of non-financial assets considers a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to other market participants would use the asset in its highest and best use.*

*Impairment losses of continuing operations, if any, are recognized in the statement of profit or loss and other comprehensive income under expense categories that are consistent with the functions of the impaired assets.*

**m. Foreclosed collaterals**

*Foreclosed collaterals acquired in settlement of loans are recognized at their net realizable values or stated at their carrying amount of loans, whichever is lower. Net realizable value is the fair value of the collateral after deducting the estimated costs of disposal. The excess of loan balances which has not been paid by debtors over the value of foreclosed collaterals is charged to allowance for possible losses or loans in the current year.*

*The difference between the value of the foreclosed collateral and the proceeds from the sale is recognized as a gain or loss at the time of sale of the collateral.*

*The Bank regularly evaluates the value of foreclosed collaterals. The allowance are provided based on the impairment of foreclosed collaterals.*

**w. Perpajakan**

Beban pajak tahun berjalan ditetapkan berdasarkan taksiran penghasilan kena pajak tahun berjalan. Aset dan liabilitas pajak tangguhan diakui atas perbedaan temporer aset dan liabilitas antara pelaporan komersial dan pajak pada setiap tanggal pelaporan.

Aset pajak tangguhan diakui untuk seluruh perbedaan temporer yang dapat dikurangkan dan akumulasi rugi fiskal yang belum dikompensasi, bila kemungkinan besar laba kena pajak akan tersedia sehingga perbedaan temporer dan rugi pajak belum dikompensasi, dapat dimanfaatkan, kecuali:

- i) jika aset pajak tangguhan timbul dari pengakuan awal aset atau liabilitas dalam transaksi yang bukan transaksi kombinasi bisnis dan tidak mempengaruhi laba akuntansi maupun laba kena pajak/rugi pajak; atau
- ii) dari perbedaan temporer yang dapat dikurangkan atas investasi pada entitas anak, aset pajak tangguhan hanya diakui bila besar kemungkinannya bahwa beda temporer itu tidak akan dibalik dalam waktu dekat dan laba kena pajak dapat dikompensasi dengan beda temporer tersebut.

Jumlah tercatat aset pajak tangguhan ditelaah pada setiap tanggal pelaporan dan diturunkan apabila laba kena pajak mungkin tidak memadai untuk mengkompensasi sebagian atau semua manfaat aset pajak tangguhan. Aset pajak tangguhan yang tidak diakui ditinjau ulang pada setiap tanggal pelaporan dan akan diakui apabila besar kemungkinan bahwa laba kena pajak pada masa yang akan datang akan tersedia untuk pemulihannya.

Aset dan liabilitas pajak tangguhan diukur dengan menggunakan tarif pajak yang diperkirakan akan berlaku pada tahun saat aset dipulihkan atau liabilitas diselesaikan berdasarkan tarif pajak dan peraturan pajak yang telah berlaku atau yang secara substantif telah berlaku pada tanggal pelaporan.

**w. Taxation**

*Current tax expense is provided based on the estimated taxable income for the current year. Deferred tax assets and liabilities are recognized for temporary differences between the financial and the tax bases of assets and liabilities at each reporting date.*

*Deferred tax assets are recognized for all deductible temporary differences and carry forward of unused tax losses, to the extent that it is probable that taxable profits will be available against which deductible temporary differences, and the carry forward of unused tax losses can be utilized, except:*

- i) where the deferred tax asset relating to the deductible temporary difference arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss; or*
- ii) in respect of deductible temporary differences associated with investments in subsidiaries, deferred tax assets are recognized only to the extent that it is probable that the temporary differences will reverse in the foreseeable future and taxable profit will be available against which the temporary differences can be utilized.*

*The carrying amount of a deferred tax asset is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the benefit of that deferred tax asset to be utilized. Unrecognized deferred tax assets are reassessed at each reporting date and are recognized to the extent that it has become probable that future taxable profit will allow the deferred tax assets to be recovered.*

*Deferred tax assets and liabilities are measured at the tax rates that are expected to apply on the year when the asset is realized or the liability is settled, based on tax rates and tax laws that have been enacted or substantively enacted as at reporting date.*

**3. PERTIMBANGAN KRITIS AKUNTANSI DAN SUMBER UTAMA KETIDAKPASTIAN ESTIMASI**

Dalam penerapan kebijakan akuntansi Bank, yang dijelaskan dalam Catatan 2, penyusunan laporan keuangan Bank mengharuskan manajemen untuk membuat pertimbangan, estimasi dan asumsi yang mempengaruhi jumlah yang dilaporkan dari pendapatan, beban, aset dan liabilitas, dan pengungkapan atas liabilitas kontinjensi, pada akhir periode pelaporan.

Ketidakpastian mengenai asumsi dan estimasi tersebut dapat mengakibatkan penyesuaian material terhadap nilai tercatat aset dan liabilitas yang terpengaruh pada periode pelaporan berikutnya.

**Pertimbangan**

Pertimbangan berikut ini dibuat oleh manajemen dalam rangka penerapan kebijakan akuntansi Bank yang memiliki pengaruh paling signifikan atas jumlah yang diakui dalam laporan keuangan:

Kelangsungan usaha

Manajemen Bank telah melakukan penilaian terhadap kemampuan Bank untuk mempertahankan kelangsungan usaha dan menilai keyakinan bahwa Bank memiliki sumber daya untuk melanjutkan bisnis di masa mendatang.

Selain itu, manajemen menilai tidak adanya ketidakpastian material yang dapat menimbulkan keraguan signifikan terhadap kemampuan Bank untuk mempertahankan kelangsungan usahanya. Oleh karena itu, laporan keuangan dilanjutkan untuk disusun atas basis kelangsungan usaha.

Nilai wajar atas instrumen keuangan

Semua aset dan liabilitas dimana nilai wajar diukur atau diungkapkan dalam laporan keuangan dapat dikategorikan pada level hirarki nilai wajar, berdasarkan tingkatan input terendah yang signifikan atas pengukuran nilai wajar secara keseluruhan:

- Level 1: harga kuotasian (tanpa penyesuaian) di pasar aktif untuk aset atau liabilitas yang identik yang dapat diakses pada tanggal pengukuran.
- Level 2: input selain harga kuotasian yang termasuk dalam level 1 yang dapat diobservasi untuk aset dan liabilitas, baik secara langsung atau tidak langsung.
- Level 3: input yang tidak dapat diobservasi untuk aset dan liabilitas.

**3. CRITICAL ACCOUNTING JUDGMENTS AND KEY SOURCES OF ESTIMATION UNCERTAINTY**

*In the application of the Bank's accounting policies, which are described in Note 2, the preparation of the Bank's financial statements requires management to make judgments, estimates and assumptions that affect the reporting amounts of revenues, expenses, assets and liabilities, and the disclosures of contingent liabilities, at the end of the reporting periods.*

*Uncertainty about these assumptions and estimates could result in outcomes that may require material adjustments to the carrying amounts of the assets and liabilities affected in future periods.*

**Judgments**

*The following judgments are made by management in the process of applying the Bank's accounting policies and that have the most significant effects on the amounts recognized in the financial statements:*

Going concern

*The Bank's management has made an assessment of the Bank's ability to continue as a going concern and is satisfied that the Bank has the resources to continue in business for the foreseeable future.*

*Furthermore, the management is not aware of any material uncertainties that may cast significant doubt upon the Bank's ability to continue as a going concern. Therefore, the financial statements continue to be prepared in a going concern basis.*

Fair value of financial instruments

*All assets and liabilities in which fair value is measured or disclosed in the financial statements can be classified in fair value hierarchy levels, based on the lowest level of input that is significant on the overall fair value measurement:*

- *Level 1: quoted (unadjusted) market prices in active markets for identical assets or liabilities accessible at the measurement date.*
- *Level 2: inputs other than quoted prices included in level 1 for the assets and liabilities, which is directly or indirectly observable.*
- *Level 3: unobservable inputs for the assets and liabilities.*

**3. PERTIMBANGAN KRITIS AKUNTANSI DAN SUMBER UTAMA KETIDAKPASTIAN ESTIMASI (lanjutan)**

**Estimasi dan asumsi**

Di bawah ini adalah asumsi utama mengenai masa depan dan sumber estimasi ketidakpastian utama lainnya pada akhir periode pelaporan, yang memiliki risiko signifikan yang mengakibatkan penyesuaian material terhadap jumlah tercatat aset dan liabilitas dalam periode pelaporan berikutnya.

Cadangan kerugian penurunan nilai kredit yang diberikan

Bank melakukan penilaian terhadap penurunan nilai dalam dua cara, yaitu:

- a. Individual, dilakukan untuk jumlah aset keuangan yang melebihi ambang batas (*threshold*) tertentu dan aset keuangan yang memiliki bukti objektif penurunan nilai yang telah teridentifikasi secara terpisah pada tanggal laporan posisi keuangan. Kerugian penurunan nilai adalah selisih antara nilai tercatat dan nilai kini dari estimasi terbaik atas arus kas masa depan dan realisasi agunan pada tingkat suku bunga efektif awal dari aset keuangan tersebut.

Estimasi ini dilakukan dengan mempertimbangkan kapasitas utang dan fleksibilitas keuangan debitur, kualitas pendapatan debitur, jumlah dan sumber arus kas, industri di mana debitur beroperasi, dan nilai realisasi agunan. Estimasi jumlah dan waktu pemulihan masa depan akan membutuhkan banyak pertimbangan. Jumlah penerimaan tergantung pada kinerja debitur pada masa mendatang dan nilai agunan, keduanya akan dipengaruhi oleh kondisi ekonomi di masa depan, di samping itu agunan mungkin tidak mudah dijual. Nilai aktual arus kas masa depan dan tanggal penerimaan mungkin berbeda dari estimasi tersebut dan akibatnya kerugian aktual yang terjadi mungkin berbeda dengan yang diakui dalam laporan keuangan.

**3. CRITICAL ACCOUNTING JUDGMENTS AND KEY SOURCES OF ESTIMATION UNCERTAINTY (continued)**

**Estimates and assumptions**

*Below are the key assumptions concerning future and other key sources of estimation uncertainty at the end of the reporting period that may have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial period.*

Allowance for impairment losses on loans

*The Bank performs assessment of the impairment amounts in two ways, namely:*

- a. *Individually, made to the amount of financial assets that exceed certain threshold and to certain financial assets that have objective evidence that impairment has been identified separately on the date of the statement of financial position. Impairment loss is the difference between the carrying amount and the present value of the best estimated future cash flows and realization of collateral at the initial effective interest rates of financial assets.*

*The estimates are made by considering the debt capacity and financial flexibility of the debtor, debtor's earnings quality, quantity and source of cash flows, industry in which the debtor operates, and realizable value of collateral. Estimating the amount and timing of future recovery will require a lot of considerations. The amount of revenue depends on the performance of the debtor in the future and the value of collateral, both of which will be affected by future economic conditions, in addition to the fact that the collateral may not be easily sold. The actual value and date of receipt of future cash flows may differ from the estimates and as a result, actual loss which occurs may be different from the amount recognized in the financial statements.*

**3. PERTIMBANGAN KRITIS AKUNTANSI DAN SUMBER UTAMA KETIDAKPASTIAN ESTIMASI (lanjutan)**

**Estimasi dan asumsi (lanjutan)**

Cadangan kerugian penurunan nilai kredit yang diberikan (lanjutan)

Bank melakukan penilaian terhadap penurunan nilai dalam dua cara, yaitu (lanjutan):

- b. Kolektif, dilakukan untuk jumlah aset keuangan yang tidak melebihi ambang batas (*threshold*) tertentu, tidak memiliki bukti objektif penurunan nilai dan aset keuangan yang memiliki bukti objektif penurunan nilai, namun belum diidentifikasi secara terpisah pada tanggal laporan posisi keuangan.

Bank menelaah aset keuangan mereka pada nilai wajar melalui penghasilan komprehensif lain dan aset keuangan pada biaya diamortisasi yang mengharuskan untuk mengakui kerugian kredit ekspektasian pada setiap tanggal pelaporan untuk mencerminkan perubahan risiko kredit selain dari aset keuangan pada nilai wajar melalui laba rugi. Bank menggabungkan informasi *forward-looking* dan historis, terkini dan yang diperkirakan ke dalam estimasi kerugian kredit ekspektasian.

Dalam melakukan peninjauan penurunan nilai, penilaian manajemen berikut diperlukan:

- i. Penentuan apakah aset mengalami penurunan nilai berdasarkan indikator tertentu seperti, kesulitan keuangan debitur, penurunan kualitas kredit; dan
- ii. Penentuan umur kredit ekspektasian yang mencerminkan:
  - Jumlah yang tidak bias dan probabilitas tertimbang yang ditentukan dengan mengevaluasi kemungkinan dari berbagai hasil; dan
  - Nilai waktu dari uang.

Pada setiap tanggal pelaporan, Bank menghitung kerugian kredit ekspektasian. Jika terjadi kenaikan risiko kredit yang signifikan sejak pengakuan awal maka estimasi kerugian kredit ekspektasian akan dihitung sepanjang umur kontrak.

**3. CRITICAL ACCOUNTING JUDGMENTS AND KEY SOURCES OF ESTIMATION UNCERTAINTY (continued)**

**Estimates and assumptions (continued)**

Allowance for impairment losses on loans (continued)

The Bank performs assessment of the impairment amounts in two ways, namely (continued):

- b. Collectively, made to the amount of financial assets that do not exceed certain threshold, and do not have objective evidence of impairment, and to the financial assets that have objective evidence of impairment, but has not been identified separately on the date of statement of financial position.

The Bank reviews its financial assets at fair value through other comprehensive income and financial assets at amortized cost which require to recognize the expected credit loss at each reporting date to reflect changes in credit risk of the financial assets not at fair value through profit or loss. The Bank incorporates forward-looking and historical, current and forecasted information into expected credit loss estimation.

In carrying out the impairment review, the following management's judgments are required:

- i. Determination whether the assets is impaired based on certain indicators such as, amongst others, financial difficulties of the debtor's, deterioration of the credit quality of the debtor's; and
- ii. Determination of expected credit life that reflect:
  - An unbiased and probability-weighted amount that is determined by evaluating a range of possible outcomes; and
  - The time value of money.

At reporting date, the Bank calculates expected credit loss. If there is a significant increase in credit risk since initial recognition, the estimated expected credit loss will be calculated throughout the life of the contract.

**3. PERTIMBANGAN KRITIS AKUNTANSI DAN SUMBER UTAMA KETIDAKPASTIAN ESTIMASI (lanjutan)**

**Estimasi dan asumsi (lanjutan)**

Cadangan kerugian penurunan nilai kredit yang diberikan (lanjutan)

Kerugian kredit ekspektasian merupakan estimasi probabilitas tertimbang dari kerugian kredit (yaitu nilai kini dari seluruh kekurangan kas) selama perkiraan umur instrumen keuangan. Kekurangan kas adalah selisih antara arus kas yang terutang kepada Bank sesuai dengan kontrak dan arus kas yang diperkirakan akan diterima oleh Bank.

Perhitungan cadangan kerugian penurunan nilai atas aset keuangan yang dinilai secara kolektif berdasarkan karakteristik risiko kredit yang sama dengan mempertimbangkan segmentasi kredit berdasarkan permodelan kerugian masa depan.

Penentuan nilai wajar dan taksiran masa manfaat ekonomis aset tetap

Aset tetap milik Bank dalam bentuk tanah dan bangunan diukur berdasarkan nilai wajarnya. Bank menggunakan jasa penilai independen yang terdaftar di OJK untuk mengestimasi nilai aset tetap berdasarkan pendekatan data pasar, pendekatan pendapatan dan pendekatan biaya. Informasi mengenai penilai independen dan cara penentuan nilai wajar masing-masing dijelaskan dalam Catatan 12 dan 34.

Masa manfaat setiap aset tetap Bank ditentukan berdasarkan kegunaan yang diharapkan dari aset tersebut. Estimasi ini ditentukan berdasarkan evaluasi teknis internal dan pengalaman atas aset sejenis.

Masa manfaat setiap aset ditinjau secara periodik dan disesuaikan apabila prakiraan berbeda dengan estimasi sebelumnya karena keausan, keusangan teknis dan komersial, hukum atau keterbatasan lainnya atas pemakaian aset. Namun terdapat kemungkinan bahwa hasil operasi di masa mendatang dapat dipengaruhi secara signifikan oleh perubahan atas jumlah serta periode pencatatan biaya yang diakibatkan karena perubahan faktor yang disebutkan di atas.

Perubahan masa manfaat aset tetap dapat mempengaruhi jumlah biaya penyusutan yang diakui dan penurunan nilai tercatat aset tersebut.

Nilai tercatat aset tetap diungkapkan dalam Catatan 12.

**3. CRITICAL ACCOUNTING JUDGMENTS AND KEY SOURCES OF ESTIMATION UNCERTAINTY (continued)**

**Estimates and assumptions (continued)**

Allowance for impairment losses on loans (continued)

Expected credit losses are estimated weighted probabilities of credit losses (is the present value of all cash shortages) over the estimated life of the financial instrument. Cash shortages are the difference between the cash flows owed to the Bank in accordance with the contract and the cash flows that are expected to be received by the Bank.

Calculation of allowance for impairment losses on financial assets assessed collectively are grouped based on similar credit risk characteristics and taking into account the loan segmentation based on future loss model.

Fair value measurement and estimated useful life of fixed assets

Fixed assets in the form of land and buildings owned by the Bank are measured based on its fair value. The Bank used an independent appraiser registered in OJK to estimate the value of fixed assets based on market data approach, income approach and cost approach. Information regarding independent appraiser and valuation method to determine its fair value are described in Notes 12 and 34, respectively.

The useful life of each item of the Bank's fixed assets is estimated based on the period over which the asset is expected to be available for use. Such estimation is based on internal technical evaluation and experience with similar assets.

The estimated useful life of each asset is reviewed periodically and updated if expectations differ from previous estimates due to physical wear and tear, technical or commercial obsolescence and legal or other limits on the use of the asset. It is possible, however, that future results of operations could be materially affected by changes in the amounts and timing of recorded expenses brought about by changes in the factors mentioned above.

A change in the estimated useful life of any item of fixed assets would affect the recorded depreciation expense and decrease in the carrying values of these assets.

The carrying amounts of fixed assets are disclosed in Note 12.

**3. PERTIMBANGAN KRITIS AKUNTANSI DAN SUMBER UTAMA KETIDAKPASTIAN ESTIMASI (lanjutan)**

**Estimasi dan asumsi (lanjutan)**

Liabilitas imbalan kerja

Nilai kini atas imbalan kerja karyawan tergantung dari banyaknya faktor yang dipertimbangkan oleh aktuaris berdasarkan beberapa asumsi. Perubahan atas asumsi-asumsi tersebut akan mempengaruhi nilai tercatat atas imbalan kerja karyawan.

Asumsi yang digunakan dalam menentukan biaya atau pendapatan untuk imbalan kerja termasuk tingkat diskonto dan tingkat kenaikan gaji. Adanya perubahan pada asumsi ini akan mempengaruhi jumlah tercatat kewajiban pensiun. Bank menentukan tingkat diskonto yang tepat pada setiap akhir tahun. Ini merupakan tingkat suku bunga yang digunakan untuk menentukan nilai kini atas arus kas masa depan yang diestimasi akan digunakan untuk membayar imbalan kerja. Dalam menentukan tingkat diskonto yang sesuai, Bank mempertimbangkan tingkat suku bunga atas obligasi pemerintah yang mempunyai jatuh tempo yang menyerupai jangka waktu imbalan kerja karyawan.

Pajak penghasilan

Pertimbangan signifikan dilakukan dalam menentukan provisi atas pajak penghasilan badan. Terdapat transaksi dan perhitungan tertentu yang penentuan pajak akhirnya adalah tidak pasti dalam kegiatan usaha normal.

Bank mengakui liabilitas atas pajak penghasilan badan berdasarkan estimasi apakah akan terdapat tambahan pajak penghasilan badan. Penjelasan lebih rinci diungkapkan dalam Catatan 2w dan 26.

**3. CRITICAL ACCOUNTING JUDGMENTS AND KEY SOURCES OF ESTIMATION UNCERTAINTY (continued)**

**Estimates and assumptions (continued)**

Employee benefits

The present value of the employee benefit obligations depends on a number of factors that are determined on an actuarial basis using a number of assumptions. Any changes in these assumptions will impact the carrying amount of employee benefit obligations.

The assumptions used in determining the net cost (income) for employee benefits include the discount rate and the rate of increase in salaries. Any changes in these assumptions will have an impact on the carrying amount of pension obligation. The Bank determines the appropriate discount rate at the end of each year. This is the interest rate that should be used to determine the present value of estimated future cash outflows expected to be required to settle the pension obligations. In determining the appropriate discount rate, the Bank considers the interest rates of government bonds that have terms to maturity approximating the terms of the related employee benefit liability.

Income tax

Significant judgment is involved in determining the provision for corporate income tax. There are certain transactions and computation for which the ultimate tax determination is uncertain during the ordinary course of business.

The Bank recognizes liabilities for expected corporate income tax issues based on estimates of whether additional corporate income tax will be due. Further details are disclosed in Notes 2w and 26.

**28. LIABILITIES FOR EMPLOYEE BENEFITS (continued)**

The tables below show the sensitivity analysis of the present value of employee benefit obligation in the assumed changes in the discount rate and salary increment rate (unaudited):

The sensitivity analysis presented above may not be representative of the actual change in the defined benefit obligation as it is unlikely that the change in assumptions would occur in isolation of one another as some of the assumptions may be correlated.

Furthermore, in presenting the above sensitivity analysis, the present value of the defined benefit obligation has been calculated using the projected unit credit method at the end of the reporting period, which is the same as that applied in calculating the defined benefit obligation recognized in the statement of financial position.

There was no change in the methods and assumptions used in preparing the sensitivity analysis from prior year.

The maturity of the benefits obligation as of December 31, 2024 and 2023 are as follows: (unaudited)

The average duration of employees' benefits liability as of December 31, 2024 and 2023 are 9.26 and 9.30 years, respectively.

Teknik penilaian dan asumsi yang diterapkan untuk tujuan pengukuran nilai wajar

Nilai wajar aset keuangan dan non-keuangan, dan liabilitas keuangan ditentukan sebagai berikut:

- Manajemen menganggap bahwa nilai tercatat kas, giro pada Bank Indonesia, giro pada bank lain, penempatan pada Bank Indonesia dan bank lain, efek-efek, efek yang dibeli dengan janji dijual kembali, kredit dan tagihan akseptasi, kewajiban akseptasi, liabilitas segera, liabilitas sewa simpanan dan simpanan bank lain dengan suku bunga tetap yang diakui dalam laporan keuangan mendekati nilai wajarnya karena jatuh tempo dalam jangka pendek atau yang memiliki tingkat suku bunga pasar.
- Portofolio kredit Bank secara umum terdiri dari kredit yang diberikan dengan suku bunga mengambang dan suku bunga tetap. Kredit yang diberikan dinyatakan berdasarkan jumlah nilai tercatat. Nilai wajar dari kredit yang diberikan menunjukkan nilai diskon dari perkiraan arus kas masa depan yang diharapkan akan diterima oleh Bank. Perkiraan arus kas ini didiskontokan dengan menggunakan suku bunga pasar untuk menentukan nilai wajar.

Bank menggunakan hierarki berikut untuk menentukan dan mengungkapkan nilai wajar dari instrumen keuangan:

- Tingkat 1 - nilai wajar efek-efek dengan syarat dan kondisi standar dan diperdagangkan di pasar aktif ditentukan dengan mengacu pada kuotasi harga pasar.

**34. CLASSIFICATION AND FAIR VALUE OF ASSETS AND LIABILITIES (continued)**

The following table shows the carrying amount and estimated fair values of the Bank's financial assets and liabilities as of March 31, 2025 and December 31, 2024 (continued):

Valuation techniques and assumptions applied for the purpose of measuring fair value

The fair value of financial and non-financial assets and financial liabilities are determined as follows:

- Management considers that the carrying amount of cash, current accounts with Bank Indonesia, current accounts with other banks, placements with Bank Indonesia and other banks, securities, securities purchased under agreement to resell, loans, acceptance receivable, acceptance liabilities, liabilities due immediately, lease liabilities, deposits from other banks with fixed interest recognized in the financial statements approximate their fair values either because of their short-term maturities or they carry market rates of interest.
- Generally, the Bank's portfolio consists of loans with floating and fixed interest rates. Loans are stated at carrying amount. The fair value of loans represents the discounted amount of estimated future cash flows expected to be received by the Bank. The estimated future cash flows is discounted using the current market rates to determine its fair value.

The Bank adopts the following hierarchy for determining and disclosing the fair value of financial instruments:

- Level 1 - fair value of securities with standard terms and conditions and traded on active markets are determined with reference to quoted market prices.

**34. KLASIFIKASI DAN NILAI WAJAR ATAS ASET DAN LIABILITAS (lanjutan)**

Bank menggunakan hierarki berikut untuk menentukan dan mengungkapkan nilai wajar dari instrumen keuangan (lanjutan):

- Tingkat 2 - Nilai wajar aset keuangan dan liabilitas keuangan lainnya (tidak termasuk yang dijelaskan di atas) ditentukan sesuai dengan model penentuan harga yang berlaku umum berdasarkan analisis *discounted cash flow* menggunakan harga dari transaksi pasar yang dapat diamati saat ini dan kutipan *dealer* untuk instrumen sejenis.
- Tingkat 3 - Nilai wajar aset tetap ditentukan antara lain dengan menggunakan pendekatan pasar yang mempertimbangkan harga yang baru terjadi di pasar dari transaksi aset yang identik atau sebanding, pendekatan pendapatan yang mempertimbangkan pendapatan yang akan dihasilkan aset selama masa manfaatnya dan menghitung nilai melalui proses kapitalisasi. Kapitalisasi merupakan konversi pendapatan menjadi sejumlah modal dengan menggunakan tingkat diskonto yang sesuai, serta pendekatan biaya yang berdasarkan prinsip harga yang akan dibayarkan pembeli di pasar untuk aset yang akan dinilai, tidak lebih dari biaya untuk membeli atau membangun untuk aset yang setara, kecuali ada faktor waktu yang tidak wajar, ketidaknyamanan, risiko atau faktor lainnya.

Tabel berikut ini memberikan analisis dari nilai wajar dari aset dan liabilitas yang dikelompokkan ke level 1 sampai 3 didasarkan pada sejauh mana nilai wajar diamati:

**34. CLASSIFICATION AND FAIR VALUE OF ASSETS AND LIABILITIES (continued)**

The Bank adopts the following hierarchy for determining and disclosing the fair value of financial instruments (continued):

- Level 2 - Fair value of other financial assets and financial liabilities (excluding those described above) are determined in accordance with generally accepted pricing models on discounted cash flow analysis using prices from observable current market transactions and dealer quotes for similar instruments.
- Level 3 - Fair value of fixed assets was determined based on market approach that considers current market value from identical or comparable assets transaction, income approach that considers the value of income that generates by the assets during its useful life and calculating the value through capitalization. Capitalization is conversion process from revenue into equity through appropriate discount rate, also cost approach that is based on cost principal that will be paid by the buyer in the market for the assets that valued less than its cost to buy or to build the comparable assets, except for unfair timing factor, inconvenience, risk or other factors.

The following table provides an analysis of fair values of the assets and liabilities, grouped into levels 1 to 3 based on the degree to which the fair value is observable:

- vi. Agunan

Dalam rangka mitigasi risiko kredit, salah satu bentuk upaya yang dilakukan Bank adalah dengan meminta nasabah memberikan agunan yang akan digunakan sebagai jaminan atas pelunasan fasilitas kredit yang telah diberikan oleh Bank jika nasabah mengalami kesulitan keuangan yang menyebabkan nasabah tidak dapat melunasi kewajibannya kepada Bank.

Agunan yang digunakan sebagai jaminan atas fasilitas kredit oleh nasabah adalah sebagai berikut:

- Deposito berjangka, rekening tabungan, dan deposito angsuran
- Standby L/C
- Piutang
- Tanah dan bangunan
- Kendaraan bermotor
- Emas
- Kapal laut
- Mesin dan peralatan
- Persediaan
- Asuransi kredit
- Garansi perusahaan atau garansi perorangan

Prosedur penilaian jaminan untuk tanah dan bangunan, kendaraan maupun mesin dan peralatan menggunakan pihak ketiga sebagai penilai independen dan akan dinilai kembali secara berkala setiap 2 (dua) tahun sekali untuk jenis kredit non-angsuran dan saat kredit telah mencapai setengah (50%) dari periode kredit untuk jenis kredit angsuran.

- vi. Collateral

In order to mitigate credit risk, one of the efforts undertaken by the Bank is requesting customers to provide collateral to be pledged as assurance for repayment of the loan facility which has been granted to the Bank if the customer is experiencing financial difficulties causing customers not able to pay their obligations to the Bank.

Collateral to be pledged as assurance for the loan facility provided by the customers are as follows:

- Time deposits, savings accounts, and installment deposit
- Standby L/C
- Receivables
- Land and buildings
- Vehicles
- Gold
- Ships
- Machineries and equipment
- Inventories
- Loan insurance
- Corporate guarantee or personal guarantee

Collateral assessment procedure for land and building, vehicles, as well as machineries and equipment is using a third party as an independent appraiser and will periodically reassessed every 2 (two) years for non-installment loans and when the loan has reached half (50%) of its period for installment loan.

**36. RISK MANAGEMENT (continued)**

**Liquidity Risk**

**Liquidity Risk Management**

Guidelines and policies are very important in terms of risk management application, so the Bank always reviews the guidelines and policies related to liquidity periodically, at least once in a year. The results of review conducted by the management brought about the limit adjustments, such as dealer limit, counterparty limit and Bank's Asset and Liability Committee (ALCO).

The Board of Directors oversees the management of liquidity through the ALCO meeting held every month. In addition, the core banking system also helps provide useful information for monitoring liquidity on a daily basis. Excess liquidity is allocated in the form of financial investments such as government bonds and deposits with Bank Indonesia.

The Commissioners monitor risks through the Risk Monitoring Committee.

**Sensitivitas Nilai Tukar**

Analisis sensitivitas nilai tukar diukur dengan kemampuan kelebihan modal Bank untuk menyerap potensi kerugian dari nilai tukar yaitu membuat asumsi perubahan/fluktuasi nilai tukar yang berlawanan arah dengan masing-masing posisi nilai tukar. Sensitivitas potensi kerugian nilai tukar berdasarkan data historis selama setahun ke belakang.

Kelebihan modal Bank mampu menutup risiko nilai tukar.

Hal ini disebabkan karena posisi devisa neto Bank yang rendah sedangkan kelebihan modal Bank yang tinggi, sehingga manajemen percaya bahwa Bank dinilai tidak rentan terhadap pergerakan nilai tukar.

Tabel dibawah menunjukkan sensitivitas Bank atas kemungkinan perubahan yang terjadi berdasarkan fluktuasi dari nilai tukar historis, dengan semua variabel lainnya tetap konstan.

**1. Foreign Exchange Risk**

**Foreign Exchange Sensitivity**

Foreign exchange sensitivity analysis is measured by the ability of the Bank's excess capital to absorb potential foreign exchange losses by assuming that foreign exchange fluctuation will go adversely to each foreign exchange position. Potential exchange loss sensitivity is based on historical data for one year.

Excess capital was able to cover potential loss from foreign exchange risk.

This was because the Bank held a very low net open position, while its excess capital was very high; thus, the management believes that the Bank is not significantly susceptible to foreign exchange movements.

The table below shows the Bank's sensitivity for a given reasonable possible change based on volatility of historical exchange rates, with all other variables remaining constant.

**2. Risiko Suku Bunga**

Apabila terjadi perubahan suku bunga secara paralel pada aset dan liabilitas, Bank akan terekspos risiko suku bunga. Rasio RSA (*Rate Sensitive Assets*) terhadap RSL (*Rate Sensitive Liabilities*)

| Rasio /<br>Ratio | 30 Juni 2025 /<br>June 30, 2025 | 31 Desember 2024 /<br>December 31, 2024 |

| RSA / RSL        | 179,69%                         | 171,08%                                 |

**Sensitivitas Suku Bunga**

Analisis sensitivitas suku bunga diukur dengan kemampuan kelebihan modal Bank untuk menyerap potensi kerugian dari perubahan suku bunga, yaitu membuat asumsi perubahan/fluktuasi suku bunga. Sensitivitas suku bunga dilakukan dengan perubahan suku bunga naik secara *paralel shifted* sebesar 0,25% dan 1% dengan mempertimbangkan kondisi fluktuasi suku bunga pasar. Hal disebabkan karena kelebihan modal Bank yang cukup untuk menutup perubahan suku bunga pada laporan posisi keuangan sehingga manajemen Bank menilai Bank tidak rentan terhadap pergerakan suku bunga.

Analisis sensitivitas suku bunga digunakan untuk menganalisis dampak kemungkinan perubahan suku bunga terhadap laba atau rugi dan ekuitas. Perubahan estimasi nilai wajar dan arus kas untuk perubahan suku bunga pasar didasarkan pada volatilitas tingkat suku bunga historis dengan mempertahankan variabel lainnya tetap konstan.

Apabila suku bunga meningkat atau menurun sebesar 1,00% dan 0,25% untuk efek-efek diukur pada nilai wajar melalui laba rugi dan penghasilan komprehensif lain dengan menganggap variabel lainnya tetap konstan, pendapatan bunga bersih Bank akan meningkat atau menurun:

**2. Interest Rate Risk**

If there are parallel changes in interest rates on assets and liabilities, the Bank will be exposed to interest rate risk. The ratio of RSA (*Rate Sensitive Assets*) to RSL (*Rate Sensitive Liabilities*)

**Interest Rate Sensitivity**

Interest rate sensitivity analysis is measured by the ability of the Bank's excess capital to absorb potential loss from interest rate movements by making assumptions about interest rate movement. Interest rate sensitivity is determined with the increasing interest by 0.25% and 1% parallel shifted. This rate is taken by considering the fluctuated condition of market interest. This was because the Bank had strong excess capital to cover interest rate changes in the statement of financial position; thus, the management of the Bank considers it to be not significantly susceptible to interest rate movement risk.

Interest rate sensitivity analysis is used to analyze probable change in interest rate affecting the profit or loss and equity. The estimated change in fair value and cash flows for changes in market interest rates are based on the volatility of historical interest rates, with all other variables remaining constant

If interest rates increase or decrease by 1.00% and 0.25% for securities measured at fair value through profit or loss and other comprehensive income with all other variables remaining constant, the net interest income would have been higher or lower:

| Suku Bunga /<br>Interest Rate | Dampak pendapatan (Rp)<br>Income impact (Rp) |  |
